PROFESSIONAL SUMMARY

CompTIA Security+ certified Cybersecurity Analyst and B.Tech Computer Science student (CGPA 8.17) with demonstrated SOC operations experience in SIEM monitoring, threat detection, log analysis, and incident response across enterprise-simulated environments. Proficient in Splunk, Wireshark, MITRE ATT&CK;, and Linux-based security workflows, backed by 6 industry certifications including Let's Defend SOC Level 1, TryHackMe SOC Path, Google Cybersecurity Professional, and Microsoft SC-900. Currently pursuing SC-200 (Microsoft Security Operations Analyst) to deepen cloud-native detection capabilities with Microsoft Sentinel and Defender XDR. Actively seeking SOC Analyst, Tier 1 Security Analyst, Threat Detection, or Blue Team roles — remote, hybrid, or international.

CERTIFICATIONS & PROFESSIONAL TRAINING

CompTIA Security+ (SY0-701) **[CERTIFIED]**
CompTIA — Threats & Attacks, Architecture, Implementation, Operations, GRC

SC-200: Microsoft Security Operations Analyst **[IN PROGRESS]**
Microsoft — Microsoft Sentinel, Defender XDR, KQL, threat hunting & incident management

SOC Analyst Certified — Level 1 **[CERTIFIED]**
Let's Defend — Real-world SOC alert triage, malware analysis & incident documentation

TryHackMe SOC Level 1 Path **[COMPLETED]**
TryHackMe — Alert triage, phishing investigation, SIEM operations & threat intelligence

Google Cybersecurity Professional Certificate **[CERTIFIED]**
Google / Coursera — Linux, MySQL, Python scripting, network security & incident response

Microsoft Certified: SC-900 — Security, Compliance & Identity Fundamentals **[CERTIFIED]**
Microsoft — Azure AD, IAM, compliance frameworks, Microsoft Sentinel concepts

Microsoft Cybersecurity Analyst Professional Certificate **[CERTIFIED]**
Microsoft / Coursera — Threat detection, cloud security operations, incident response

Tata Cybersecurity Analyst Job Simulation **[COMPLETED]**
Forage / TCS — IAM strategy, RBAC design & cybersecurity documentation · Dec 2024

CORE COMPETENCIES & TECHNICAL SKILLS

- ◆ SIEM Operations (Splunk)
- ◆ Security Operations (SOC)
- ◆ MITRE ATT&CK Framework
- ◆ Vulnerability Management
- ◆ Linux Administration (CLI)
- ◆ Incident Detection & Response
- ◆ Alert Triage & Escalation
- ◆ Wireshark / Network Security
- ◆ Identity & Access Mgmt (IAM)
- ◆ SQL / MySQL
- ◆ Threat Hunting & Analysis
- ◆ Log & Event Analysis
- ◆ Phishing & Malware Analysis
- ◆ IDS / IPS Concepts
- ◆ Detection Engineering (basics)

TOOLS, PLATFORMS & TECHNOLOGIES

SIEM & Detection Splunk (Free Tier) · Microsoft Sentinel (learning, SC-200) · Wazuh (familiar)
Network Analysis Wireshark · tcpdump · Nmap (basics)
Threat Intel VirusTotal · ANY.RUN · CyberChef · MITRE ATT&CK; Navigator
SOC Platforms Let's Defend · TryHackMe · Hack The Box (learning)
OS & Scripting Linux CLI (proficient) · Windows · Python (basic scripting) · Bash
Databases MySQL · SQL query-based log analysis

Cloud & Identity Microsoft Azure (SC-900 / SC-200) · Azure AD / Entra ID · RBAC / IAM
Frameworks MITRE ATT&CK; · NIST CSF · Cyber Kill Chain · CIA Triad · ISO 27001 (awareness)

CYBERSECURITY PROJECTS & SOC SIMULATIONS

Incident Response & SIEM Log Analysis **Splunk · Wireshark · SOC Playbooks**

- Executed end-to-end incident response simulations — triaged 50+ mock security alerts, performed packet capture analysis, and produced formal incident documentation following SOC L1 playbook methodology, achieving a simulated 40% reduction in mean-time-to-detect.
- Correlated multi-source log events in Splunk; classified True Positive / False Positive alerts and escalated confirmed incidents per SOC L1 escalation procedures — demonstrating structured threat detection workflow.

Phishing Campaign Analysis & IOC Extraction **TryHackMe · CyberChef · MITRE ATT&CK; · Threat Intelligence**

- Investigated 10+ simulated phishing campaigns — extracted Indicators of Compromise (IOCs) including malicious URLs, suspicious email headers, and payload hashes; correlated against threat intelligence feeds using VirusTotal and ANY.RUN.
- Mapped attack patterns to MITRE ATT&CK; techniques (T1566.001 Spearphishing Attachment, T1078 Valid Accounts); produced formal analyst reports detailing attack vectors, IOCs, and recommended remediation for each campaign.

Linux Hardening, Vulnerability Assessment & Access Controls **Linux CLI · SQL · CIS Benchmarks**

- Performed basic vulnerability assessments across Linux environments; implemented file-system access controls, configured user permission hierarchies, and audited sudo access logs to identify privilege escalation risks.
- Applied CIS Benchmark standards to harden Linux systems — identified and remediated misconfigurations; used SQL queries to analyse security logs and detect anomalous database activity patterns.

IAM Strategy Design — Enterprise Simulation **Tata / TCS Forage · RBAC · IAM · Least Privilege**

- Delivered comprehensive Identity & Access Management (IAM) documentation for a simulated TCS enterprise consulting engagement, aligning cybersecurity controls with business objectives and regulatory requirements.
- Designed Role-Based Access Control (RBAC) policies, least-privilege access frameworks, and onboarding/offboarding security workflows for a multi-team environment — demonstrating GRC-aligned security planning.

PROFESSIONAL EXPERIENCE

Office Receptionist / IT Support Associate
Vivekananda Trade Test Center · Deoria, Uttar Pradesh, India 2023

- Provided Tier-1 IT support with a security-first mindset — managed user access requests, enforced data confidentiality protocols, and resolved 15+ technical issues monthly with zero data incidents recorded.
- Maintained audit-ready client records with strict data accuracy and confidentiality controls — directly applicable to security documentation and chain-of-custody practices in SOC environments.
- Coordinated scheduling between engineers and clients, demonstrating professional stakeholder communication, prioritisation under pressure, and organisational efficiency.
- Delivered first-line hardware and software troubleshooting for staff, reducing operational disruptions and building foundational IT operations experience relevant to SOC tooling administration.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science *(Currently Pursuing)*
Integral University, Lucknow, India
2024 – Present | **Expected Graduation: 2028** | CGPA: 8.17 / 10.00
3rd Semester Completed · Specialisation: Cybersecurity & Network Security

ADDITIONAL INFORMATION

Languages: English (Professional Working Proficiency) · Hindi (Native)

ATS Keywords: SOC Monitoring · SIEM · Threat Detection · Incident Response · Log Analysis · MITRE ATT&CK; · Splunk · Wireshark · Security Operations · Threat Hunting · Network Security · Alert Triage · Vulnerability Management · Blue Team · Detection Engineering · Cybersecurity Operations · EDR · Cloud Security

Interests: SOC Operations · Threat Hunting · Detection Engineering · Cloud Security · Blue Team Defense · CTF Challenges

Availability: Immediately available — Remote (worldwide), Hybrid, International relocation, Shift-based SOC work, Visa-sponsorship welcome
